## ABOUT ME

Results-driven IT professional with strong expertise in software development, web. applications, and enterprise solutions. Skilled in building responsive, scalable, and high-performance systems across multiple domains. Adept at working with front-end and back-end technologies, ensuring smooth integration and seamless user experience

---

## WORK EXPERIENCE

AIZTS InfoTech Pvt Ltd | May 2024 - present

[My-Portfolio](#)

### Associate Software Engineer

- Debugged and fixed issues in production applications, ensuring minimal downtime for users.
  - Developed and maintained REST APIs with Node.js and Express for internal and client-facing projects.
  - Built frontend features in React.js, including dashboards, forms, and state-driven UIs.
  - Wrote optimized SQL queries in PostgreSQL for data retrieval, reporting, and performance tuning.
  - Collaborated with team members on bug triage, support ticket resolution, and urgent production fixes.
  - Built clean, scalable UI using React.js, MERN stack, PostgreSQL, Prisma, Tail
- 

## SKILLS

- Development :- HTML CSS, Tailwind CSS, Javascript
- FrameWork :- React Js, Redux, Tan Stack Query, Material UI, Shad CN UI, Daisy UI
- Backend :- Knowledge of Node Js, Express Js
- Testing Tools :- API Tesing, Postman, Dev Tool, console, Api Integeration
- Database Management :- PostgreSQL
- OS :- Linux
- Version Control :- Git, Git Bash, Github
- Ms Excel
- Deployment & Hosting:- Vercel, Netlify
- System Design: CRUD Operations, Authentication (JWT, OAuth), API Integration
- Agile & Scrum Methodologies
- Cross-Functional Team Collaboration
- Problem Solving & Critical Thinking
- Requirement Gathering & Analysis

## PROFESSIONAL EXPERIENCE & PROJECTS

### Web Application Development – Job

#### & Recruitment Domain :-

- Designed and developed a full-featured job portal system with role-based access (Admin, Recruiter, Job Seeker).
- Implemented secure authentication (login, signup, OTP-based password recovery) with unique email validation for all roles.
- Built dashboards for recruiters and job seekers with features like resume builder, profile management, and application tracking.
- Integrated real-time notifications via Email & WhatsApp, enabling recruiters to schedule interviews and send automated updates to candidates.
- Developed application management tools for recruiters, including shortlisting, rejecting, feedback, and scheduling interviews.
- Built admin monitoring system to oversee recruiter and job seeker activities, ensuring platform compliance.
- Enhanced user experience with job search filters, latest job listings on top, and validation rules (e.g., preventing duplicate applications).
- Added API integrations, WhatsApp messaging, and secure logout from multiple devices for improved system reliability.

### ERP Solution – Tailoring & Workshop Management :-

- Built a centralized tailoring management system to streamline shop operations.
- Enabled the admin to create and manage customers, workers, orders, and payouts with automated due tracking.
- Designed measurement-based task allocation, dynamically showing measurements based on customer profile and gender.
- Implemented worker assignment for orders, with automated status tracking (pending, completed).
- Developed an analytics dashboard showing total customers, workers, revenue, and order statistics.
- Integrated role-based controls and real-time reporting, improving operational efficiency.

### Workforce & Employee Operations – HR Management Domain :-

- Developed an employee management platform using the PERN stack.
- Implemented CRUD operations for employees, departments, and roles with secure authentication.
- Added attendance tracking, performance monitoring, and payroll integration features.
- Focused on scalability and modularity, ensuring smooth extension for future requirements.

### **Educational Systems – School & Academic Management**

- Created a super-admin frontend for school management using React, DaisyUI, and Shadcn UI.
- Integrated APIs with PostgreSQL (Sequelize ORM) for backend operations.
- Designed a role-based dashboard to monitor students, teachers, and school activities.
- Added responsive UI for seamless usage across devices.

### **Real-Time Communication – Chat Application :-**

- Built a chat application supporting real-time messaging using MERN stack and Socket.IO.
- Implemented private and group chats with instant updates and typing indicators.
- Added online/offline status tracking and secure user authentication.
- Optimized performance for low-latency communication with persistent message storage.

### **Retail & Inventory Systems – Jewelry Management Domain :-**

- Built a jewelry shop management system handling customers, parties, and company profiles.
- Developed features to manage gold categories, product designs, purchases, and returns.
- Integrated user-role authentication with device-based login restrictions (auto logout on multi-device use).
- Designed a comprehensive dashboard showing total customers, parties, product categories, and revenue stats.
- Collaborated on frontend development, ensuring smooth API integrations and professional UI with React + Shadcn UI.

## **EDUCATION**

### **Master of Computer Application - MCA**

*PAHSU Solapur University, Solapur*

**Jan 2022 - Jan 2024**

### **Bachelor of Computer Application - BCA**

*BVP AKIMSS, Solapur*

**July 2018 - Oct 2021**
